Deadline for manuscript  
submissions:

**31 July 2021**

### Message from the Guest Editor

The current biotechnology industry contributes significantly to increasing the global economy. Its growth is mainly attributed to a deep understanding of biological systems, supported by the development of "omics" technologies and the growing demand for biotechnological products such as biopharmaceuticals, vaccines or biofuels. Today, it is an innovative market, and there is growing business pressure for faster and cheaper bioproduct production. Improvements in data digitization and analysis have been identified as key strategic actions for the coming years to meet these challenges. The implementation of knowledge-based control and modeling in various bioprocess presents a corresponding future vision for the biotechnology industry to achieve the goals of Industry 4.0.

Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/systems related research in chemistry, biology, materials and allied engineering fields. Our goals are to publish high impact articles of broad interest to the process systems community and to serve as a forum for major developments in process/systems research. The journal publishes regular research papers, communications, letters, short notes, and reviews. There are no restrictions on the length of published articles or on the use of color illustrations. All submitted manuscripts undergo rigorous peer review prior to publication.

## Author Benefits

**Open Access:**—free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** Indexed in the **Science Citation Index Expanded** (Web of Science) and **Inspec (IET)**. Covered in **Scopus** from Vol. 5 (2017).

**CiteScore** (2019 Scopus data): **1.8**.
