

## Melanie Ottinger

[melanie.ottinger@thermofisher.com](mailto:melanie.ottinger@thermofisher.com)

Melanie Ottinger is a Field Application Specialist (FAS) at Thermo Fisher Scientific. She oversees and supports single-use technologies in the biopharma and biotech markets across the EMEA region. She is also an influential member of the Single-Use Technologies Advisory Board at DECHEMA and an active science communicator in the miwelt project at the daspool association.

Melanie holds a Masters' degree in Pharmaceutical Biotechnology from the Zurich University of Applied Sciences ZHAW. Associated as a Research Assistant in the Bioprocess Technology Section of the ZHAW, her primary focus was on upstream processing and sustainable technologies. In particular, she was responsible for the development and optimization of bioprocesses (in 1 L to 50 L scale batch-, fed-batch and continuous modes) for cell cultures as well as microorganisms, including yeasts, bacteria, and microalgae.
